

V. E. S. Goes Green

Vacherie Elementary School is partnering with Progressive Waste Solutions to help recycle paper, plastics, and aluminum products in our school. Mr. Chris Vizzini and Ms. Amy Macintosh, employees of Progressive Waste Solutions, met with Mrs. Julie and the V. E. S. 4-H leaders to discuss the plans that the 4-H Club and the HOPE program have in our school to recycle paper, boxes, and plastics (for starters).

Beginning this month, the 4-H students and HOPE students will collaborate with the teachers, cafeteria workers, custodians, and fellow students to become conscience of recycling products. This will reduce waste in our landfills. Paper bins/Plastic bins will be placed in each classroom and/or various locations of the school to allow paper and plastics to be deposited until emptied in a Progressive Waste Solutions dumpster.

Our goal, in 4-H and HOPE, is to make students aware to recycle materials at home-to make Vacherie Elementary School, as well as, our parish of St. James beautiful.

Pictured are (from left to right) Mrs. Debbie Louis and Mrs. Eva Knight (V.E. S. 4-H leaders), Ms. Amy Macintosh, Mr. Chris Vizzini (Progressive Waste Solutions employees), and Mrs. Julie Dautat, V. E. S. principal.
